Material UI, Bootstrap, WordPress

Android App: Android Studio (Java)

Server: Spring Boot (Java), .Net (C#)

Database: SQL

ECDL certificate

JELIĆ IVAN

SOFTWARE ENGINEERING

INTERNSHIP:

- 2021 Internship at VegaIT as a Full Stack Developer.
Led full-stack development for the Timesheet application during my internship. Developed a dynamic React.js interface and implemented features including login, registration, pagination, project and client management, task-specific work hours, category organization, team collaboration, and report generation. Utilized a technology stack of React, CSS, Bootstrap, jQuery, and .NET.
- Secured 2nd Place in the Singidunum Hackathon 2021, Artificial Intelligence, Web category. Developed a real-time web application within 24 hours, leveraging camera input to recognize and track human movement, dynamically adjusting the frame to follow the person's path. This achievement showcases my ability to innovate and deliver solutions under tight deadlines in a competitive hackathon environment
- Interned at Marble IT in 2018, specializing in Web Development with a focus on Vue.js. Successfully designed and implemented a one-page chat application, enabling instant messaging between randomly generated users.
- 2023 Internship at Intermino as Sales Force
(Sales force Developer, Salese Force Administrator)

PORTFOLIO:

<https://carry-potter.github.io/Portfolio/>

Here you can view a small gallery of my projects.

<https://gitlab.com/mrrobot331/mrs-rukovalac-dokumentima>

The application enables the handling of diverse documents and document collections, implying functionalities such as sharing, copying, persistent storage, deletion, and the dynamic creation of documents with arbitrary structures.

<https://github.com/Carry-Potter/e-shop>

<https://github.com/Carry-Potter/e-shop-frontend>

The e-commerce app empowers users with seamless shopping, encompassing features like a dynamic product catalog, secure transactions, and real-time order management.
